

# Underfloor Heating Thermostats

**TH 132 Series**

**TH 131 Series**

# Ordering & Contact Information

	Heating only, 240 VAC, 16.7 A resistive, range minimum 7° 15-35°C, on/stand-by switch, internal min/max set point limits	TL7130A1006
	Tamper proof, heating only, 240 VAC, 16.7 A resistive, range minimum 7° 15-35°C, on/stand-by switch	TH116-A-240S
	Digital, heating only, 240 VAC, 16.7 A resistive, range 5-30°C, on/stand-by switch, power usage indicator	TL7135A1005
	7 Day programmable, heating only, 240 VAC, 16.7 A resistive, range 5-30°C, on/stand-by switch, power usage indicator	TL8130A1005
	Heating (or cooling), 240 VAC, 16 A resistive, range 10-35°C, on/off switch, optional neon lights on temp. fall	T4360G1006
	Cooling (or heating), 240 VAC, 10 A resistive, range 10-35°C, on/off switch, optional neon lights on temp. rise	T6360D1008
	Heat pump, heating and cooling, 240 VAC 10 A resistive, range 10-35°C, heat/off/cool switch, optional neon lights during heating & cooling cycles	T6360E1005
	Under-floor heating, 7 Day programmable, 230 VAC, 15 A resistive, range 5-30°C, floor sensor included. "F" floor control, "AF" air control with floor limit	TH132-F-230
	Under-floor heating, 230 VAC, 15 A resistive, range minimum 7° 15-35°C, on/off switch, internal min/max set point limits, floor sensor included. "F" floor control, "AF" air control with floor limit	TH132-AF-230
	Under-floor heating, 230 VAC, 15 A resistive, range minimum 7° 15-35°C, on/off switch, internal min/max set point limits, floor sensor included. "F" floor control, "AF" air control with floor limit	TH131-F-230
	Under-floor heating, 230 VAC, 15 A resistive, range minimum 7° 15-35°C, on/off switch, internal min/max set point limits, floor sensor included. "F" floor control, "AF" air control with floor limit	TH131-AF-230
	Wall plate for TH131 or TH132. Allows thermostat to fit to standard flush box. Not required for Euro flush box.	AC130-12-P10

# 240 Volt Thermostats **Honeywell**

**Comfort from Experience**

**Raising the standard of electric heating control**

# LineVoltPRO™

Honeywell's LineVoltPRO™ range of 240Vac thermostats combine accurate home heating control with a modern style. Their slim wall profile and 16.7A high current switching capacity ensure they look great on any wall whilst safely handling the heating load.

Advanced technology minimizes temperature swings and keeps the home consistently comfortable. All models mount onto a standard wall flush box with an integral air sensor. All LineVoltPRO thermostats are soundproofed for quiet operation, require no batteries, include an on/standby function when not in use and come with a 5 year warranty.

## LineVoltPRO™ TL7130

Offers the simplicity and basic features of a conventional *dial thermostat*, with the precision and control of an electronic thermostat. Includes min/max installer set point limits.

A tamper proof version (TH116) is also available.

## LineVoltPRO™ TL7135

Delivers the features that matter most in a *non-programmable thermostat*; precise comfort control, an easy to read backlit display and a contemporary design. The TL7135 has a power usage indicator and an on-demand back light.

## LineVoltPRO™ TL8130

One of the most advanced electric heating thermostats on the market. This *7-day programmable thermostat* features easy set up and a sophisticated design.

## Xe60 (T4360/T6360)

### Mechanical Thermostats

When low cost and simplicity are important the Xe60 *dial mechanical thermostats* are the best choice for heat or cool only applications and heat pump systems.

A 16 Amp model is available for direct switching of high current heating loads. All models feature an on/off switch and optional indicator light. Mounts onto a standard wall flush box in both the vertical or horizontal position.

## Underfloor Heating Thermostats

### TH132 Series

This ultra-compact 15 Amp *7-day programmable thermostat* with 4.6 m floor sensor offers a large, easy-to-read LCD with intuitive programming icons, on-screen heating power indicator and battery-free backup.

### TH131 Series

This ultra-compact 15 Amp *dial thermostat* features hidden adjustable minimum/maximum temperature limits, on/off switch, 4.6 m floor sensor, LED indicator and is battery free.
